

TIL Plans To Showcase And Spread Awareness About Their Entire Product Range And Service Offerings At Bauma Conexpo India 2016

Hot Mix Asphalt Plants – Crushing & Screening Solutions – New and Improved Range of Truck Cranes

Partnering India's Infrastructure growth since 1944, TIL Limited is one of the leading providers of a wide range of infrastructure equipment that represent some of the finest in global technology. We are engaged in the design, manufacture and marketing of a comprehensive range of material handling, lifting, port equipment and road building solutions, duly supported by an integrated after-sales support that is geared to enhancing customer satisfaction. TIL has fully integrated state-of-the-art facilities at Kamarhatty (Kolkata) and Kharagpur, both in West Bengal – with an advanced R&D centre that reinforces the Company's commitment to pursuing excellence in manufacturing and design.

TIL's pan-India network of branch offices and area offices always ensure closer proximity to customers' job sites and maximum coverage. Acknowledged as a market leader in Mobile Cranes and ReachStackers, TIL is a name that is synonymous with reliability, productivity and efficiency.

TIL's global alliances are with Grove Worldwide of USA, Manitowoc Crane Group of USA, Hyster® – a part Nacco Materials Handling Group (NMHG), Astec Inc. of USA, PACECO Corp of USA (part of Mitsui Engineering & Shipbuilding, Japan).

TIL's products include- an extensive range of Mobile Cranes (Industrial Cranes, Truck Mounted Cranes, Rough Terrain Cranes, All Terrain Cranes), Lattice Boom Crawler Cranes, Rubber-tyre Gantry Cranes, Lorry Loaders, ReachStackers, Container Handlers, Forklifts, Hot Mix Asphalt Plants, Crushing & Screening Solutions. At TIL, we have always been consistent in our endeavor to provide our customers with innovative solutions that ensure higher returns on their investments and enhance overall profitability.

This year at Bauma Conexpo India 2016, we have our technology partner, ASTEC Industries, as our co-exhibitor. On display at our booth – H2.L42 – will be a model of the ASTEC Voyager 120 – a highly compact and portable Hot Mix Asphalt Plant – unique in its class for its ability to run up to 30% RAP, backed by TIL's unmatched service support. The ASTEC Voyager 120 is built around a counter-flow drum featuring ASTEC v-flights, which provide greater uniformity of the aggregate veil during the drying process, resulting in better heat transfer, reduced fuel usage and increased productivity.

Our focus at the Bauma will also be to create awareness about our Crushing & Screening solutions and the new range of Truck Cranes from TIL. We have recently introduced the TMS 855, the truck crane in the 55 tonne category, and the TM 825 in the 25 tonne category, with the longest boom in its class. This is the first time a 'formed' boom is being manufactured in India.

This is the second time that TIL is exhibiting at Bauma in India. It is one of the largest trade fairs in India dedicated to the construction equipment industry, and TIL – along with co-exhibitor ASTEC Industries – expect substantial footfall of our target customer segment. We plan to showcase and enhance awareness about our entire product portfolio and service offerings that include Hot Mix Asphalt Plants, Crushing & Screening Solutions, new and improved range of Truck Cranes, among others. Going forward, we are confident that the leads generated during the show will translate into positive business opportunities for the Company.
